Nach dem Einschieben in das Rahmenseitenteil ist jeder Steckverbinder mit einem Sicherheitsstift (Teil 6) sofort zu sichern!

Insert push-in connector (6) into side section and secure it immediately with a safety pin!

Après avoir introduit le connecteur emboîtable dans la section de côté arrêter-le immédiatement avec une goupille de sécurité (6)!

Na het inschuiven in het zijprofiel insteekverbinding (6) onmiddellijk met een borgpen beveiligen!

FLOW SHELF, STRAIGHT VERSION WITH INCLINED PICKING TRAY, TYPE #4

Position des Drehkreuzes bauseits festlegen. Wenn möglich mittig unter das Einlegeblech. Zwischen Drehkreuz und Einlegeblech sollten 1-2 mm Luft sein.

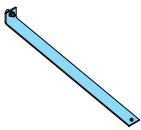

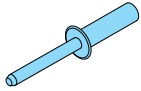

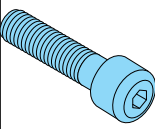

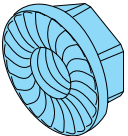

The position of the turnstile is to be determined by the operator. Ideally, it is placed centrally under the side edges of the picking tray. A distance of 1-2 mm between turnstile and picking tray is recommendable.

Le positionnement du croisillon est à déterminer par l'opérateur. Idéalement le croisillon tient la tablette de prélèvement en son milieu. Une distance de 1-2 mm entre croisillon et tablette est recommandée.

De positionering van het draaikruis wordt door de monteur bepaald. Indien mogelijk, draaikruis als middenondersteuning onder de zijken van de uitnameleghbord aanbrengen. Een afstand van 1-2 mm tussen draaikruis en uitnameleghbord is ideaal.
